

New float needle with 'Viton' rubber tip

Newly available from Amal is a super-quality float needle with this exciting new feature – a resilient sealing tip made from 'Viton' rubber.

The new float needle fits all Amal Concentric and Monobloc carburettors. It has been specifically designed to help in overcoming carburettor flooding problems of all kinds – notably those caused by dirt, or by wear after prolonged usage.

The rubber tip of every float needle is precision-ground to provide a truly conical surface for perfect sealing. The tip material possesses excellent corrosion resistance and is unaffected by all normal gasoline-type fuels.

Please specify Part No. 622/197 when ordering.
